

FlagStone

FlagStone consists of six identically shaped pavers, each with its own unique pattern, in six beautiful color blends that easily fit together to create an authentic look of natural flagstone at a fraction of the cost.

Where function meets style

ABBOTSFORD
CONCRETE PRODUCTS

Ideal for decks, patios, sidewalks and pool surrounds

Dimensions: 19-3/4"x15"x 2-3/8" Actual area of each piece: 1.5 sq ft

This paver is installed in the same way as our other pavers, however, FlagStone requires the application of a Polymeric Joint Sand to fill the joints.

Note: Due to this paver's unique profile, a special mat is required to be placed on the bottom of the compactor. Please contact your dealer for complete details.

We strongly recommend using the Techni-Seal RG+ Polymeric Joint Sand, which is designed specially for use with products with wider joints, such as FlagStone.

Regardless of the polymeric joint sand used, it is critical that you follow the manufacturer's specific application instructions to ensure a successful installation. Please consult your Abbotsford Concrete dealer for full details.

Not recommended for vehicular applications
